

One Time per Calendar Year Sewer Portion Pool Adjustment Policy

Sewer Adjustment Policy: In addition to the sewer adjustment policy, MUPB will allow customers a one time “one month” sewer pool adjustment. The sewer adjustment is as follows:

Customer pays for actual water usage for that month.

And, sewer usage calculated on pool size will be adjusted one time per calendar year

*The one-time pool sewer adjustment will be determined per address for any customer.

**Customer must provide written documentation of the date pool was filled, gallon size of pool, measurements of pool and photo proof of the filling of pool with a correct date.

NOTE: Customer will need to fill out pool sewer adjustment paperwork within same month as the filling of the pool. Customer will be responsible to sign a form acknowledging that all documentation is true, and this is their one-time adjustment for the sewer portion of their bill reflecting the gallons submitted to MUPB for the calendar year pool adjustment.
